Dear Parents and Guardians,

As part of our commitment to ensuring all students have the necessary tools to succeed in their studies, we are reminding all parents of the requirement for all students to have a scientific calculator by 1st September 2025.

Scientific calculators are an essential tool in helping students understand and solve complex mathematical problems. They will be used regularly across various subjects, including mathematics, science, and in their school assessments. As a result, we kindly request that you begin planning for the purchase of a scientific calculator for your child in preparation for the upcoming school year.

We understand that purchasing educational supplies can sometimes be a financial challenge, and we want to ensure that no student is left without the necessary tools due to financial limitations. If your family is unable to provide a scientific calculator, please know that the school is here to support you. We have a limited number of calculators available and will be providing them to students in need, free of charge.

If you require assistance or would like to discuss how we can support you in acquiring a scientific calculator, please feel free to contact me via email at sophie.baxter@coopacademies.co.uk. We are committed to ensuring that all students have the resources they need to thrive academically.

The suggested model is the Casio FX-83GTCW (in any colour). This calculator is the easiest to use and will also be the one used by their class teacher.
